

HOW TO USE THIS SITE

Introduction

Introducing Homework Rules – the step-by-step guide to helping your child with primary homework.

Do you feel panicked when your child asks for help with their homework? Is it all a mystery to you? Don't worry – you're not on your own! We'll give you the insider tools and tricks that make homework as easy as 1,2,3 – for you and your child.

WHAT'S IN HOMEWORK RULES

Hi, I'm here to guide you through the site. Remember to turn up your volume or you won't hear me! The Text Only version of the site is there if you prefer to read rather than listen.

We'll explain the things your child is learning in class. For example, if you click on Fractions, a lot of topics appear. You don't have to go through all of them – just choose the one you find most useful, and click on it to go there.

This site will give you the confidence to help your child with their homework. If you go to the Tips for Parents section, you'll get advice on all kinds of homework issues, from helping your child to manage homework, to common problems parents and kids face. Hopefully we've got an answer for you.

Sometimes there are words in your child's homework that you've never seen before. That's why we have the Maths Dictionary. Click on the word and it will be explained.

If you'd like to keep a copy of any of the information or try out more activities, check out the Printouts section. There, you can view and print any of the information you need – free of charge!
